| Checklist of Cognitive Distortions* | | | | | |
|---|---|--|--|--|--|
| 1. All-or-Nothing Thinking. You view things in absolute, black-and-white categories. | 6. Magnification and Minimization. You blow things out of proportion or shrink them. | | | | |
| Overgeneralization. You view a negative event as a never-ending pattern of defeat: "This always happens!" | 7. Emotional Reasoning. You reason from your feelings: "I <i>feel</i> like an idiot, so I must really <i>be</i> one." | | | | |
| 3. Mental Filter. You dwell on the negatives and ignore the positives. | 8. Should Statements. You use shoulds, shouldn'ts, musts, oughts, and have tos. | | | | |
| 4. Discounting the Positive. You insist that your positive qualities don't count. | 9. Labeling. Instead of saying, "I made a mistake," you say, "I'm a jerk" or "I'm a loser." | | | | |
| 5. Jumping to Conclusions. You jump to conclusions not warranted by the facts. | 10. Blame. You find fault instead of solving the problem. | | | | |
| Mind-Reading. You assume that people are reacting negatively to you. | Self-Blame. You blame yourself for something you weren't entirely responsible for. | | | | |
| Fortune-Telling. You predict that things will turn out badly. | Other-Blame. You blame others and overlook ways you contributed to the problem. | | | | |
